Edited by Lesley Curtis

ISSN 1368-230X, ISBN 978-1-902671-61-1, PSSRU, October 2008, 200 pages, paperback, £39.00

This is the latest updated volume in a well-established series bringing together information from a variety of sources to estimate national unit costs for a wide range of health and social care services.

This report consists of tables for more than 130 types of service which as well as providing the most detailed and comprehensive information possible, also quotes sources and assumptions so users can adapt the information for their own purposes.

New in this edition

This year the Unit Costs report starts with a preface describing how the publication has evolved over the years, outlining its boundaries and providing examples of the kind of cost information we include. It also discusses new developments and introduces a guest editorial and two brief articles. The guest editorial discusses National Reference Costs data for Community Care Services. The first article discusses the challenges of estimating the unit costs of group based therapies and draws on earlier work to devise a costing strategy. The second article describes the pattern of expenditure of service users in the national Individual Budgets pilot evaluation.
