Social Protection Innovative Investment in Long-Term Care

PROJECT WORKSHOP

Investing in long-term care: A social investment approach

What is “social investment” and how can it support improvements to long-term care for older people through new ways of funding and service development?

Social investment “involves strengthening people’s current and future capacities” and helping people to ‘prepare’ for life’s risks rather than simply repairing the consequences.

The SPRINT study is exploring how this could be applied to the provision of long-term care across Europe.

This workshop will discuss social investment, investment in long-term care and assessment of social investments in long-term care.

The workshop includes speakers from the SPRINT study and external speakers on key issues on social investment and long-term care, as well as interactive discussion with all delegates.

Thursday 9 November 2017
12.30–17.15

London School of Economics and
Political Science
London
WC2A 2AE, UK

REGISTRATION

Places are limited. Register now at
