

# Unit Costs of Health and Social Care 2019

Edited by Lesley Curtis and Amanda Burns

ISSN 1368-230X, ISBN 978-1-911353-10-2, PSSRU, December 2019, 178 pages, paperback, £50.00

This is the latest updated volume in a well-established series bringing together information from a variety of sources to estimate national unit costs for a wide range of health and social care services. This report consists of schema for approaching 100 types of service which, as well as providing the most detailed and comprehensive information possible, also quotes sources and assumptions so users can adapt the information for their own purposes. This year we have a guest editorial from Candice Goold (Costing Lead at NHS England and NHS Improvement) which focuses on the introduction of patient-level costing (PLICS) which has replaced the national schedule of reference costs. We also have two new articles: the first is from James Moore and Paula Baraitser concerns the pathway for the delivery of online sexual health services and the second by Emma Frew and colleagues which presents detailed information from three evaluations of obesity interventions for children and families. There are also new schema covering different types of supported housing, clinical medication reviews in care homes for older people, new information on a dementia memory service, and information on the costs of NHS provided and private abortion services. The 2019 edition is also available in full, free of charge, at the PSSRU website - [www.pssru.ac.uk/unit-costs/2019/](http://www.pssru.ac.uk/unit-costs/2019/) - as an Acrobat file.
